Erosion Control Application

(TO COMPLY WITH EROSION CONTROL ORDINANCE NO. 4939 AS AMENDED)

Co. Name: _____ Contact Person: _____

Address: _____ 24 Hr Emergency #: _____

_____ E-mail: _____

Phone: _____ Fax: _____

Submittal Date _____ City Approval Date _____

Specific Project Description: _____

Specific Project Location: _____

Legal Description of Site (may be attached): _____

Total Disturbed Area*: _____

Anticipated Start Date of Excavation: _____ Completion Date: _____

Based on the information provided above, please CHECK the category of activity that best describes this project:

- Light Land Disturbing Activities: are activities which disturb less than 2000 SF of land or 40 CY of soil, sand, gravel, stone, or similar material. Or the Emergency repair of utilities or public utility projects that require any bond.
- Moderate Land Disturbing Activities: are activities which disturb more than 2000 SF but less then 1 Acre of land. Or more than 40CY but less then 2000 CY of soil, sand, gravel, stone, or similar material. Erosion Control Plan required for City Improvement Location Permit (ILP).
- Significant Land Disturbing Activities: are activities which disturb 1 Acre or more of land or 2000 CY or more of soil, sand, gravel, stone, or similar material. In order to obtain Improvement Location Permit (ILP), this requires a bond posted to the City of Mishawaka, filing an NOI with IDEM in accordance with the current Rule 5, and provide copy of NOI to the City with Erosion Control Plan Submittal.

I understand that in order to comply with Erosion Control Ordinance #4939, I agree to install erosion control measures and to perpetually maintain the site while under construction, after any rain event, and until site is fully stabilized after construction is complete and released by the City. If current measures are not effective, I shall be proactive and consult City of Mishawaka and/or IDEM for direction.

Print Name: _____ Signature: _____

*As defined by 327 IAC 15-5-4 to include any manmade change of the land surface. This includes removing vegetative cover that exposes underlying soil, excavating, filling, transporting, and grading.
